# POST-ABORTION HEALING

---

Post-abortion stress can manifest itself in many ways. Often people do not realize that the stress and emotions they are dealing with are related to their abortion.

There are four main emotional side effects of post-abortion stress for both women and men:

## Shame

Not telling people about your abortion because you fear judgement. You keep this experience a secret because you are afraid you will lose friends and acquaintances.

## Guilt

Feelings of guilt that come up unexpectedly about your abortion and the choices that were made surrounding that experience.

## Unforgiveness

Towards key players and yourself regarding your abortion experience; not truly believing that God has or will forgive you if you asked.

## Anger

Anger is a secondary emotion often displayed to cover up a more vulnerable emotion. You may be explosive, critical, impatient, passive-aggressive, or give others the silent treatment.

If you or someone you know is struggling with any of these symptoms, you aren't alone. No matter when your abortion happened, forgiveness, hope, and healing can be yours.

Life Choices offers confidential and nonjudgmental post-abortion care for men, women, and teens.

To find out more about our post-abortion healing programs, email [healingchoices@lifechoices.org](mailto:healingchoices@lifechoices.org)
